

HOW TO TIE YOUR BELT

- 1) Fold your belt in half to determine the center point.
- 2) Place the center of the belt in the center of your stomach.
- 3) Wrap each end of the belt around the back of your body and bring them to the front.
- 4) Cross the left side over the top of the right side. (this side will do all the work)
- 5) Tuck the left side under both sections of the belt and pull up between the belt and the uniform.
- 6) Cross the end that went under the belt on top of the other end.
- 7) Tuck that same side through the hole to start the knot.
- 8) Pull both ends to tighten the belt.
- 9) Both ends should hang evenly in front of your body.

(A properly tied knot should look like a fortune cookie)
